Avoid contact with the eyes and skin.
Wash hands before breaks and at the end of work.
Do not eat or drink while working.

Respiratory protection:

If the occupational exposure limit value (e.g. through adequate ventilation at the workplace or through the work place or a stationary extraction device at the workpiece), respiratory protection is not required.

The product contains low-boiling substances. In exceptional situations (e.g. unintentional release of substances release of the substance, exceeding the occupational exposure limit), respiratory protection must be worn. Here is generally for a short time (observe filter size and breakthrough time) full-face mask with an AX filter insert (e.g. filter no. 6098 from 3M, use only factory-fresh!). For concentrations above the application limit of filter devices, with oxygen contents below 17 vol% or in unclear conditions conditions, use an insulating device (DIN EN 137, observe wearing time limit).

Hand protection: Protective gloves**Material of gloves:**

Butyl rubber, BR

Recommended thickness of the material: ≥ 0.5 mm

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material:

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
